

Requirements Exercise10

You are given a list of 4 people. Each person must have a unique ID, name, city, address (street, house number, and apartment number), and contact details (phone numbers, e-mail, and Skype).

- Describe the information about these people in **JSON** and **XML** format.
- Enter the information into files and save them in the corresponding formats (**JSON** and **XML**).
- **All personal data can be randomly generated and should not contain any real or sensitive information.**
- After saving, open the files in any browser and make sure the information is displayed correctly.
- Upload the file with the completed task to **Google Drive** and send the link to the assignment in **LMS**.
