

Description of inaccuracies, ambiguities, errors:

In the table of contents, subpoints 1.1 and 1.2 are missing.
There is no information about who created the document.
Not all links in the table of contents are functional.

System Requirements:

Information errors:

- The unit of measurement for the video card is not specified – 64 what?
- The use of "@" in the processor name is questionable.

Functional requirements for List Boxer version 1.98:

- Why is the version 1.98? Usually, versions are like 1.2 or 2.3 – were 98 versions really made?
- In the command bar, we have "Edjt" instead of "Edit".
- There is no minimize/maximize button for the application.

2.1. Main functionalities:

- There is no "Save" button.
- How will the lists be saved? In what format?
- Are the lists saved automatically?
- There is no "Open" button to load lists.
- There is no button to modify lists.
- Missing alphanumeric function.
- There is no "Delete" button.
- How can we search within the lists? – missing search function.
- There is no "Create List" button.
- The "Clear List" button is inactive – or when does it become active?
- The "Range" is not centered.
- No details are provided about "Record to List" and "Total Records".

2.2. Operating modes:

Can both modes be disabled at the same time?

Alphabetic:

- Entering other characters is not allowed – what happens if we enter another type like numeric?

- What happens if we use special characters, Cyrillic letters?
- What happens if we begin with a space?
- Can we use spaces between characters?
- What is the maximum number of strings?

Digital:

- Is entering lists in numeric mode allowed?
- What happens if we exceed 9999 entries?
- What is the maximum number of strings?
- The string length 1–8 – Arabic or Roman?
- Instead of “digital,” “numeric” should be used.
- It's not specified in which mode other character types are not allowed.
- What happens if we enter a negative number?

Mixed:

- “Mixed” should be replaced with “alphanumeric.”
- How many characters can be entered?

2.3. Controls:

- "Range" is not described.
- No information about the File, Edit, and Help buttons from the menu.
- Missing instructions for dropdowns.
- Where does the “Add to List” button transfer the information?
It is not explained that the “Clear List” button is greyed out if there is no list written.
- How do we select a list?
- Does “Clear List” delete all information or can we choose what to delete?
- What is the sorting based on?
- Can we select multiple lists to delete?
- Missing scrollbar – or when does the scrollbar appear?
- Can we create lists with the same name?

2.4. Managing the display of entered information:

- In mixed mode, there is no mention of filters.
- What should be displayed in "Range"?
- For alphabetic and numeric mode, it's not specified what happens when selecting “None” or “All.”
- In mixed mode, there is no filtering for numbers.

- If in mixed mode we select filter a–m, what happens with the numbers?
- Why does it jump from 301 to 9999?
- What happens if no filter is active?
- When “All” is selected, how is the information displayed – in what order? Numerically?
- What happens in mixed mode when we select “a–m”?

2.5. Sorting displayed information in lists:

- What happens if no criterion is selected – ascending/descending?
- How are numbers in the list sorted as character strings?
- How can only part of the information be deleted?
What happens if a list starts with a space?
- How are numbers in the list selected – by how many digits or by value? Is 12 larger than 111?
- What determines ascending or descending display?
What kind of characters will appear in the list if no option is selected?
- How many lists can be displayed based on screen size?

2.6. Adding an item to the list:

- It is not specified what happens if we press "Add to List" without entering any character.
- How many items can be added – max number?
- Can we use spaces between words?
- Can special characters be used?
- How do we select a list if we want to add a new item?
- What alternative exists if neither “Add to List” nor the Enter key works?

2.7. Deleting information:

- There is no specification on how to delete information.
- Does “Clear List” delete the info or is it just like a backspace?
- Is there a confirmation prompt before deleting?
- From where is the information deleted?
- Are entire lists or only list contents deleted?
- Does deleting information mean deleting all of it?
- Is the whole list deleted or only the last item?
- What happens if there are lists with the same name?

2.8. Undoing the last action:

- No information on how to undo.
- Is only the last character written undone?
- What happens if we press “Undo” after “Clear List”?
- What happens if we press “Undo” multiple times?
- What happens if we press “Undo” before doing anything?

2.9. Contextual help:

- How is this contextual help accessed?
- How is the information in contextual help displayed?
- What information should be shown in this help?

2.10. Accessing the program description through the Help menu:

- What information should be displayed?
- Do we hover or click to open Help?
- How is the information in Help displayed?
- Where do we find the Help menu?
- Is there a shortcut for the Help menu?

2.11. Shortcuts:

- Missing shortcut for "Clear List".
- Missing shortcut for "Add to List".
- Where do we find these shortcuts?
- Do “Exit” and “Close” have the same function?
- Does Ctrl+Z undo in a window as well?
- What happens if we press Ctrl+Q in a window?

Questions:

- What does the application icon look like? After installation, how can I identify it?
- Shouldn't there be a login feature? Can anyone make changes? – data security
- What happens if I meet only 2 out of the 3 minimum system requirements?
- Why is the application window so small? For someone with visual impairments, it's very hard to use.
- Why isn't there a Maximize button? Everything is too small and hard to notice, especially with similar letters like “Il,” “I|,” “00.”
- What happens if someone accidentally closes the app? Are the lists saved?
- What's the difference between “Records in list” and “Total Records”?

- If you work from home and leave the computer, and a child starts pressing buttons, can you return to the previous version?
- Is there a magnifier to enlarge the text? – for users with visual impairments
- Is voice command available?
- If the computer shuts down and the app is open, are the lists saved?
- What happens if other types of characters are entered in alphabetic mode? And in numeric mode?
- If I want combined/alphanumeric lists, how do I do it? There are only two options – alphabetic or numeric.
- How do I search in the lists? And how do I search for a list?
- Where is the list/document saved?
- If I want to share the lists, how do I do that?
- What field is the application intended for?
- Can I start a list with a space?
- Can I have multiple lists with the same name?
- What does “Clear List” do? Delete the document or just the data in a list?
- How many strings can a list contain?
- Can negative numbers be entered?
- What information should be shown in “range”?
- Do I need an internet connection to use the app?
- Why is the filter range in mixed mode so large – “301–9999”?
- If I select ALL, how is the info displayed? In what order?
- If I have 8 strings in a list and want to delete the 4th, how do I do that? Can I select item 4 or must I delete everything after it too?
- How can I undo an action?
- What does “contextual help” refer to?
- How do you access contextual help?
- Aren’t “Help” and “Contextual Help” the same? – the terms are similar.
- Where do we find the shortcuts?
- How many users can access the lists simultaneously?
- Where can I download the app? How do I install it?
- If I uninstall the app, what happens to the created lists?
- How can I restrict access for children?
- What does the question mark “?” near the close button represent?
- After deleting a list, can I use “Undo”?
- Can the application language be changed?
- If there were a login window and I’m logged in, when I close the app, do I have to log out, or does it happen automatically to prevent someone else from accessing my account?
