

This document contains completed templates used during my Manual Tester course at GoIT.

The templates reflect practical applications of testing theory through structured exercises and homework assignments. Each template was filled in based on specific instructions, simulating real scenarios encountered in manual testing environments.

Test Case Template

The following test case example demonstrates how I structured test steps, test data, and expected results for one of the assigned exercises. This template helped me practice designing both positive and negative test scenarios in a systematic and professional way.

A1							

Bug Report Template

The bug report example below was created after identifying an issue while executing a test case. It includes preconditions, reproduction steps, actual vs expected results, and details such as severity, priority, and testing environment.

A1	Title						
	A	B	C	D	E	F	G
1	Title						
2	Pre-conditions:						
3	1						
4	2					Severity:	
5	Step to reproduce						
6	1					Priority:	
7	2						
8	3					Environment:	
9	Actual result:						
10	Expected result:						
11							
12							
13							
14	Title	Pretul prduselor nu este afisat pe pagina prdusuluia					
15	Pre-conditions:						
16	1	Login pe pagina https.....				Severity	
17	2	Foloseste orice rol				High	
18	Step to reproduce					Priority	
19	1	Selecteaza o categorie de produse (ex: haine)				High	
20	2	Click pe unul dintre produse				Environment:	
21	Actual result: Pagina produsului este deschisa si pretul nu este afisat					Staging	
22	Expected result: Pretul este vizibil pe pagina produsului						
23

Conclusion

These templates were essential for building a strong foundation in manual testing. They helped me improve my attention to detail and taught me how to communicate clearly and effectively within a QA context. All examples presented here were part of the official course tasks and reflect my understanding and application of QA best practices.
